

The complete solution for the hearing health of professionals exposed to noise

COTRAL Sound communication kit

Efficient and comfortable hearing protection

Adaptation to your communication system

An micro-headset with a high-performance even at more than 100 dB(A)

Designed for professionals using a communication system in noisy environments: petroleum and chemical industry, metallurgy, civil engineering, call centres...

The COTRAL Sound is easy to insert, ergonomic (it does not move, even under difficult conditions) and the technical qualities of its differential electret microphone provide it an exceptional sound quality; interference noises are markedly reduced to ensure maximum communication comfort.

For 5 you key points

- The comfort of a customised hearing protection made of Crylit®.
- Exceptional communication quality, even at more than 100 dB(A).
- The great stability of the micro-headset owing to its neckpiece which ensures perfect use for professionals who move around.
- Compatibility of the micro-headset with your hands-free compatible walkie-talkie* or telecommunication system*.
- Maximum complete safety owing to simultaneous wearing of goggles, a safety helmet and the hearing protections.

Description

the hook facilitating locking of the protection in the ear

the alphanumeric code written on the protection:

in red for the protection for the right ear and in blue for the left ear

the handle for grasping the protection

the canal and fitting

the acoustic filter

COTRAL Sound communication kit

Customised hearing protection made of Crylit®
 3D digital manufacture based on ear impressions
 Adaptable to a walkie-talkie or telephone

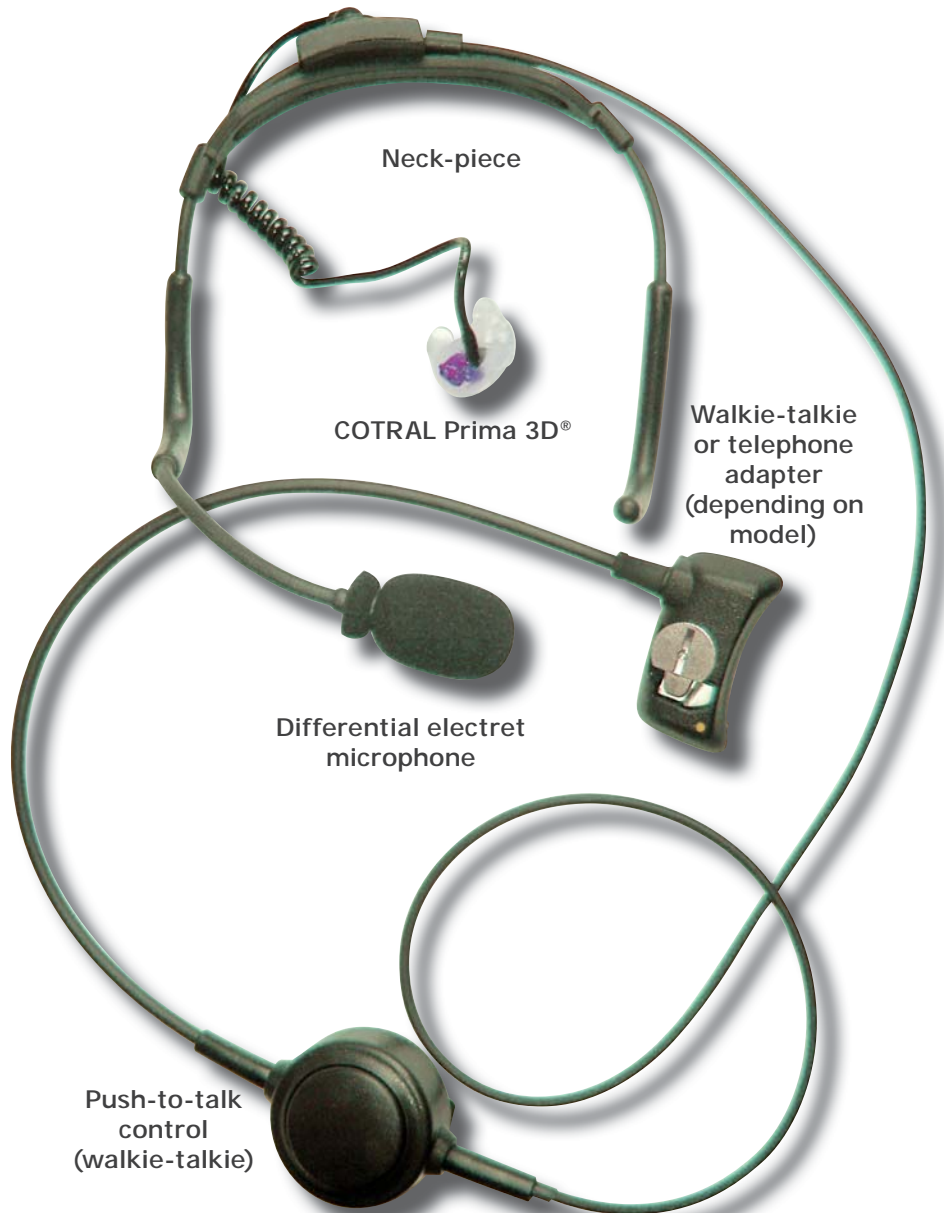

Communication with complete freedom

Adaptable to a walkie-talkie* or telephone fitted with a hands-free connection, the COTRAL Sound is equipped with a broad manual PTT control with a fixing clip to allow easy communication.

* Further information on compatible models is available at +33 (0) 2 31 69 36 36

made to measure protection

The micro-headset is connected to a COTRAL Prima 3D® customised hearing protection made of Crylit®. 3D manufacturing based on a scan of the impressions taken at your site by your COTRAL Prevention Technician means that you will benefit from a comfortable customised protection that is easy to use, without having to worry about storing the impressions which are digitally stored in the Laboratory. Double locking with the hook allows proper positioning of the protection in the ear.
